XII	Periodontics	T	19
XIII	Orthodontics	D	23
XIV	Oral Implants	J	26
XV	Hourly fee for treatment of the mentally and /or physically disabled	U	31
XVI	Subscription fees	Z	31

Code	Description	Points	Explanation
C	I. Consultations and Diagnostics		
	Part A: Diagnostic consultations		
	The procedures for C11, C12 and C13 include:		
	- measuring and registration of CPSI-scores:		
	- giving information, instruction and advice on preventative behaviour and/or measures,		
	- carrying out minor treatment procedure(s) which are not defined otherwise in this list;		
	- referral to another care provider.		
C11	Periodic preventative consultation first visit in a calendar year	3,8	
C12	Periodic preventative consultation second and following visit in the same calendar year	3,8	
C13	Incidental consultation	3,8	May only be charged for if: - this consultation takes place on the initiative of the patient in case of pain; and - it does not concern periodic preventative consultation; and - no other payable treatment is rendered (with the exception of X-ray diagnostics and anaesthetics) Not in combination with C11 or C12
	Part B: Extended diagnostic examination		
	Extensive examination of masticatory functioning		see chapter IX
	Extensive periodontal examination		see chapter XII
	Extensive examination orthodontics		see chapter XIII
	Extensive dental implant examination		see chapter XIV
C22	Medical anamnesis in writing	3,8	Payable only if anamnesis is still required after posing routine questions about the patient's oral health. Incl. discussion with the patient and, if necessary, contact with GP or consultant.
C28	Extensive consultation for drawing up a treatment plan in writing, incl. discussion with the patient	18	Not in combination with C11, C12 or C13 in the same session
C29	Study casts required for drawing up a treatment plan	5	Casts of upper and lower jaws, excl. laboratory cost (in orthodontics casts are included in the fee)
C65	Methodical filing of upper or lower front	10	Per session

Code	Description	Points	Explanation
Part C: Consultation for insurance purposes			
C70	Dental assessment report with bitewings	7,4	This includes: - filling out a standard questionnaire, and two bitewing X-rays, not more than one year old, which may or may not be kept by the insurer
C75	Dental assessment report without bitewings	4,9	Filling out a standard questionnaire, without bitewing X-rays
C 76	Issuing an oral health statement	3	Simple statement with limited information on the patient's oral situation and prognosis

Part D: Miscellaneous

C80-C87 are intended as surcharges

C 80	House call	3	Excl. travel expenses
C 84	Preparation for treatment under general anaesthetic	8	Intended to make arrangements for treatment in a general hospital excl. travel expenses
C 85	Weekend cover	3,8	Sat. 00.00 up to Sun. 24.00 Not to be charged at regular (non-incident) surgery hours. Also intended for regular public holidays or those days officially declare equal to public holidays by the Government. May be charged in combination with C86 or C87.
C86	Treatment in the evening	3,8	Between 18.00-24.00 hrs. Not to be charged at regular (non-incident) surgery hours. May be charged in combination with C85
C 87	Treatment at night	3,8	Between 24.00 - 07.00 hrs May be charged in combinatio with C85
C 90	Missed appointment		If the appointment has not been cancelled in time (24 hours in advance at the latest) the time reserved may be charged for in fairness from 0-100% of the treatment planned. This under the assumption that no other patients could be treated or other work could be done. Patients have to be informed about this rule.

This is not a formal Nza code.

X II X-ray Diagnostics

X10	Intra oral X-ray	2.8	Per X-ray
-----	------------------	-----	-----------

Code	Description	Points	Explanation
X21	Panoramic radiograph	12	Not for orthodontic treatment or implantology in edentulous jaws (see X22 and X23)
X22	Panoramic radiograph for implantology in edentulous jaws	12	
X24	Transcranial X-ray	5.4	Not for orthodontic treatment (see X25)
M	III. Prevention and Oral Hygiene		
M31	Plaque score	3.5	Indexing and recording the amount of dental plaque after a colour test. Not in combination with codes from chapter XII. Part A
M32	Basic bacteriological test	3	Taking a basic plaque sample and interpreting the bacteriological data, excl. laboratory cost
	Fluoride Application:		Including preparatory mouth rinse. Also intended for chlorhexidine application
M10	1. Method 1	5	Upper and lower jaws separately (if only one jaw is treated: half the fee)
M20	2. Method II	4	Upper and lower jaws at the same time
M21	3. Method II, for groups	2	
	Oral hygiene:		The removal of supra and subgingival plaque and/or tarter including polishing the teeth
M50	Limited	2.5	Limited oral hygiene treatment includes the removal of a small amount of plaque and/or tarter and/or staining from only a few locations in the mouth (e.g.the upper molars and the lower front)
M55	Average	4.5	Average oral hygiene treatment includes the removal of a small amount of plaque and/or tarter and/or staining in the entire mouth or a more than a average amount in some specific locations
M 59	Extensive	9	Extensive oral hygiene treatment includes the removal of plaque and/or tartar and/or staining which is locally or generally present to such an extent that the necessary treatment time is considerable longer than is the case with average oral treatment

Code	Description	Points	Explanation
			Follow-up session only after consulting the patient
M60	Gum shield	3.5	Upper jaw cast and fitting
M65	Lower jaw cast for occlusion fixation	2.5	Only in combination with M60
M70	Extensive dietary analysis	10	Based on a written report by the patient about his habits. Incl.report discussion
A	IV. Anaesthetics		
A15	Surface anaesthetic	1.3	Only if not followed by A10
A10	Conduction and/or infiltration anaesthetic	2.5	Not in combination with surgical procedures (see chapters X, XII and XIV)
A20	Treatment under full anaesthetic		The actual costs (costprice) of dental treatment under full anaesthetic can be charged
B	V. Inhalation sedation		
B10	Introduction inhalation sedation	5	Intended for a explanation of the inhalation sedation procedure during the first session. Once-only.
B11	Administering inhalation sedation	5	Per session
B12	Overhead cost inhalation sedation		Per session
V	VI. Restorations with plastic materials		
V50	Excluding moisture by means of cofferdam	2	Irrespective of the number of teeth
V60	Indirect pulp capping	3	This includes: the excavation of caries profunda and application of a cement base with, if necessary, insertion of vitality conserving means
	Retention pins		Pins may be charged for separately at a cost price (V00)
V70	Parapulpal pin	2	Fee also applicable with periodontal regeneration techniques
V80	Root canal pin	3.5	
V85	Each additional root canal pin in the same tooth	1.5	
V10	Pit filling	2.5	Including cavity base, if any

Code	Description	Points	Explanation
V11	One surface restoration	4	Including cavity base, if any
V12	Two surface restoration	6.5	Including cavity base, if any
V13	Three surface restoration	8.5	This code is also used for Class IV restorations, reconstruction of incisal angles in the front Including cavity base, if any
V14	Crown of plastic material	12	Three ore more surface restoration in which at least two cusps or both incisal angles are incorporated, with anatomical shaping. Including cavity base, if any
V15	Direct labial veneering	12	Covering of the labial surface with composite or pre-fabricated plastic veneers, in one session, including acid etching (for indirect labial veneering see R78 and R79)
V20	Acid etching for composite	2	Application of an enamel and/or dentine bonding agent, including polishing the restoration
V21	Acid etching in combination with etchable base layer	4	Removal of smear layer, application of e.g. carboxylate: glass-ionomer cement: acid etching, application of bonding agent for a composite restoration, including polishing the filling (not in combination with V20)
V30	Fissure sealing: first tooth	4.5	Including acid etching
V35	Additional tooth in the same session	2.5	Including acid etching
V40	Polishing amalgam fillings, renovation old composite restorations, treatment of sensitive gingival and application of medicament	1	Per tooth, this fee is payable only if the filling has not been polished previously

E VII. Endodontics (pulpal treatment)

E Besides codes from chapter VII Endodontics, no codes from other chapters may be charged for endodontic treatment in one session, with the exception of codes C84-C87 and codes from the chapters X-ray Diagnostics and Anaesthetics . The treatment in chapter VII is exclusive of:

- anaesthetics
- X-rays
- preparations necessary prior to root canal treatment
- cost of specific materials, such as MTA
- final restoration
- rubber dam isolation

I. Examination, diagnostics and treatment planning

E01	Endodontic consultation	3,8	Investigation into the cause of the complaint, DETI score assessment and discussion of the endodontic treatment plan
-----	-------------------------	-----	--

Code	Description	Points	Explanation
E02	Extensive endodontic consultation	7	Investigation into the cause of the complaint, DETI score assessment, filling in the Endodontic Treatment Classification, discussion of the endodontic treatment plan, deciding on referral and writing a letter of referral, if any. Payable only with DETI score B. Not in combination with codes E 77 and E78.
E03	Consultation after dental trauma	5,5	Extensive consultation according to Dental Traumatology Guideline, not in combination with E 01 and E 02.
II. Endodontic Treatment			
A Pulp treatment with the purpose to conserve vitality			
E60	Partial or total pulpotomy	8	Removal of damaged or infected pulp tissue, controlling the bleeding and application of a hermetically sealing restoration material.
B Root canal treatment of a tooth with fully formed closed apex, uncomplicated			
E04	Surcharge for the cost of rotating nickel titanium instrumentation		Payable per treatment for single use. Only in combination with codes E 13, E 14, E 16, E 17, E 61.
E13	Tooth with one root canal only	18	This includes: opening up the pulp chamber, length assessment, preparation, irrigation, and the insertion of a gutta-percha canal filling in combination with a root canal cement.
E14	Tooth with two root canals	26	
E16	Tooth with three root canals	34	
E17	Tooth with four root canals or more	42	
E85	Electronic length assessment	2,5	Per tooth
E19	Insertion of calcium hydroxide per tooth, per session	3	In case the treatment is not completed in one session. This also involves the repeated removal of calcium hydroxide and checking the preparation lengths and reference points in the next session. It also includes the insertion and/or removal of a temporary filling. Not in combination with codes E 61, E 62, E 63, E 77, E 78.
C Purchases for complications			
Only payable in cases of DETI score B and Class II or III Classifications			
E51	Removal of crown or bridge	6	The removal of a cast metal or gold porcelain restoration prior to the root canal treatment with the purpose to preserve the existing restoration. This does not include

Code	Description	Points	Explanation
			cutting through the crown of bridge. Per tooth.
E52	Difficult endodontic access	5	Caused by a: - cast metal, gold-porcelain crown or ceramic restoration - cast build-up post - composite build-up in the pulp chamber - extreme inclination (>30°) - extremely reduces mouth aperture (< 30 mm)
E53	-extreme inclination (>30°) Removal root canal pin	7	The removal of a metal, carbon fibre, glass fibre or ceramic root canal pin fixed in the canal with a permanent cement. Per canal.
E54	Removal of root canal filling material	5	Revision of previously completed root canal treatment. Per canal.
E55	Treatment of a calcified root canal	5	Canals not visible on radiographs and initially impenetrable with a # 10 file. Per canal.
E56	Further treatment with iatrogenic damage	7	Treatment discontinued by previous or referring dentist in connection with calcified canals, ledges, broken instruments, apical transportations, perforations, etc. Per canal.
E57	Anatomical aberrations	5	- C or S shape - Dens in dente - Dilaceration - Internal resorption with perforation - Taurodontism Per tooth.
D	Apexification procedure of tooth with immature open apex		
E61	Apexification with calcium hydroxide or MTA, first session	14	This includes: Opening up the pulp chamber, length assessment, shaping, irrigation and application of calcium hydroxide.
E62	Apexification with calcium hydroxide or MTA, next sessions	9	Opening up the pulp chamber, inspection of the apical barrier, irrigation and renewing the calciumhydroxide.
E63	Surcharge for sealing with Mineral Trioxide Aggregate (MTA)	7,5	Application of an apical barrier using MTA, including, if necessary, an extraradicular matrix of e.g. calcium sulphate, excl cost MTA.
E64	Obturation of a tooth with apexification	8	Filling with gutta-percha and cement
E66	Root canal treatment	8	Per deciduous tooth with e.g. calcium hydroxide
F	Initial root canal treatment		

Code	Description	Points	Explanation
E77	Initial root canal treatment, first canal	10	Emergency treatment in locum situations. This includes: opening up the pulp chamber, extirpation, making canals accessible for irrigation, irrigation and inserting calcium hydroxide (including temporary filling)
E78	Initial root canal treatment, each following canal	5	
G	Bleaching		
E90	Internal bleaching First session	8	This includes: the removal of filling material from the pulp chamber and the coronal part of the root canal, application of a leakproof liner and the insertion of a bleaching agent. Per tooth.
E95	Internal bleaching Each following session	3	
E97	External bleaching Irrespective of the number of teeth	12,5	This includes: casts, placing a bleaching template and giving user instructions. Per jaw. Technique costs can be charged under E00. Materials for home bleaching, only obtainable through the dentist can be charged at cost price. (E 98).
	Technique		
E98	Materials for home bleaching		At cost price (in combination with E 97)
H	Treatment of traumatised tooth		
E40	Direct pulp capping	5	Only indicated for traumatised teeth with pulp exposition in non-infected dentine that can be hermetically sealed off with a restoration on the day of the trauma.
E42	Repositioning of a luxated tooth	2	Replantation of a luxated tooth, manually or with the aid of an extractor.
E43	Fixation by means of a ligature	4	Fixing a wire and/or composite ligature (including etching) per connection. Excluding (technique/material of the (wire) ligature) cost.
E44	Removing the ligature	1	This includes removal of the ligature and composite material and polishing the teeth.
I	Rubber dam isolation		
E45	Rubber dam isolation	2	This includes creating an extra barrier in case insufficient isolation is achieved with rubber dam only.
J	Endodontic micro surgery		
	This includes performing a flap operation (with the aid of optical magnifying instruments), creating access to the apex by means of an ostectomy, removing infected tissue and putting in surgical stitches. The treatment included in part J is exclusive of the use of the operation microscope (E 86) and preparatory measures for surgical procedures in the practice (E 87)		

Code	Description	Points	Explanation
E31	Front tooth	20	
E32	Premolar	28	
E33	Molar	36	
E34	Retrograde restoration	4	Inserting a retrograde restoration of a leakproof material (excl. cost of specific materials such as MTA). Per canal.
E36	Extraction with replantation	14	Extraction, replantation. Excluding closure of a possible perforation or insertion of a retrograde sealant and exclusive of the cost of specific materials such as MTA and exclusive of fixing a ligature.
E37	Diagnostic flap operation	12	Investigative surgery to inspect root fractures, perforations, etc.
K	Operation microscope		
E86	Use operation microscope	13,5	Per session
L	Preparation of the dental surgery prior to performing surgical procedures		
E87	Preparation of the dental surgery prior to performing surgical procedures	10	Making the practice into an "operating theatre" in accordance with sterile environment requirements. Only payable if specific measures are taken that are on a par with an equipped operating theatre.
R	VIII. Restorations with non-plastic materials		
	The following fees do not include the cost of technical laboratory work, regardless of whether this was carried out by a dental technician or by the dentist himself		
	Direct composite inlay		Construction, after-polymerization outside the mouth and fitting during the same session, including acid etching
R08	One surface composite inlay	12	
R09	Two surface composite inlay	23	
R10	Three surface composite inlay	30	
	Inlay made of cast metal, synthetic resin or (glass-) ceramics		
R11	One surface inlay	18	Including temporary measure
R12	Two surface inlay	28	Including temporary measure
R13	Three surface inlay	40	Including temporary measure
R14	Extra for attached cast pin, per pin	5	E.g. pinledge, pinlay preparation
R20	Cast metal crown	40	Including temporary measure

Code	Description	Points	Explanation
R25	Cast metal crown with thermally bonded porcelain, partial preparation, or shoulder bevel preparation, cast metal crown with acrylic facet	44	Including temporary measure
R27	Jacket crown without shoulder preparation	28	Synthetic resin, including temporary measure
R26	Jacket crown with shoulder preparation	40	Porcelain or synthetic resin, including temporary measure
R28	Endo crown, indirectly made	12	Including preparation, impression and fitting, including temporary measure
R29	Stainless steel crown, pre-fabricated synthetic resin crown	10	Intended as a permanent fixture
Cores			
R31	Core of plastic material	6	Extra for parapulpal pin, or root canal pin. see V70, V80 and V85
Cast cores:			
R32	Indirect method	10	Including temporary measures
R3	Direct method	20	Including temporary measures
Bridge work			
Bridge section:			
R40	First dummy	30	
R45	Second and additional dummies within the same bridge section	15	
R46	Intra-coronal bridge anchoring, per anchor	10	E.g. UDA-system. For dummies see codes R40 and R45 respectively
R50	Metal fixation cap incl. impression	5	Irrespective of the number of caps per bridge
R55	Plaster of Paris lock incl. impression	5	Not in combination with R50
R49	Surcharge for bridges on 5 or more pontics	25	
Acid-etched retained bridge			
One dummy fixed to two teeth			Pontic with or without metal retention abutments, fixed to the acid-etched surfaces of the supporting teeth by means of composite, incl. acid etching
R60	Without preparation	20	
R61	With preparation	30	
R65	Surcharge for each additional dummy	7	

Code	Description	Points	Explanation
	within the same bridge section		
R66	Surcharge for each additional attachment above the number of two	4	
	Miscellaneous		
R70	Crown underneath an existing frame anchor	11	In addition to the crown fee
R71	Renewing a porcelain facet, repairing a metal/porcelain crown in the mouth	11	
R72	Renewal of a plastic materials facet	6	
R73	Extra retention measure, i.e. pins in a facet	4	
R74	Re-fixing cast restorations	4	
R75	Re-fixing of an acid-etched bridge	10	
R76	Extra for a cast core underneath an existing crown	5	
R77	Difficult removal of old crown and bridge work, per pontic tooth	5	
	Indirect labial veneering		Indirectly made facing of composite, synthetic resin or (glass)ceramics, fixed by means of composite acid etching technique,incl. acid etching
R78	Without preparation	12	For direct labial veneering see V15
R79	With preparation	20	Including temporary measures
	Temporary measures: Only to be charged if:		
	- this measure does not form part of crown and bridge work started by the dentist himself		
	- it concerns a semi-permanent measure, usually external and indirect		
	Individual temporary measures:		Included in crown and bridge work fees
R80	First measure	5	Fee payable only if this measure does not form part of crown and bridge work started by the dentist himself
R85	Additional measure	2	
R90	Partially completed work	-	Depending on the phase the dental work is in

Code	Description	Points	Explanation
G	IX. Gnathology		
	Part A: Craniomandibular dysfunction		
	Examination/Diagnostics		
G01	Extensive examination of masticatory functioning	25	In the case of a complaint, suspect of craniomandibular dysfunction
G02	Myography	16	Measuring and registration of muscular activity
G03	Documented gnathology referral	11	Fee payable only if preceded by an extensive examination of masticatory functioning
	Therapy (after extensive examination of masticatory functioning)		
G61	Instruction muscle exercises	10	Movement therapy for the masticatory mechanism
G62	Occlusal splint	27	Casts, registration, fitting and instruction
G63	Reposition splint	40	Casts, registration, fitting and instruction
G64	Splint check-up consultation	5	Consultation after fitting the splint, incl. minor corrections
G65	Indirect methodical filing	55	Casts, registration, cast analysis, drawing up a filing plan and methodical filing
G66	Bio feedback therapy	9	Per session
G67	Triggerpoints treatment	11	E.g. injection technique, including examination
G33	Fixed positioning of incisors/ or canines	10	E.g. by means of palatal shields, per tooth
	Therapy (without extensive examining Of masticatory functioning)		
G69	Occlusal bite plate	11	Casts, registration, fitting and instruction
	Part B: Registration methods		
	The following fees (G10 up to and including G20) are inclusive of the technical laboratory work regardless of whether this was carried out by a dental technician or the dentist himself.		
G10	Basic bite registration according to mean value before or after any preparation	15	Extra-oral, quick mount This includes transferring to a mean value articulator the position of the upper jaw in the skull in relation to the arbitrary intercondylar axis, by means of a facebow or earbow, excluding casts

Extra charge for more accurate registrations:

Code	Description	Points	Explanation
G11	Hinge axis location	15	By means of a hinge-bow and determination of the third reference point
G12	Central relation registration: the upper and lower models are cast in plaster opposite each other with aid of three wax impressions	14	In this procedure the upper model is a split cast
G13	Protral/lateral registrations	10	Lateral left and right and protral, after which the condylar path and the Bennett angle are set up
G14	Setting up of a completely adjustable articulator, pantograph and registration	90	E.g. Stuart registration, Denar
G15	Vertical bite retainment	5	E.g. by means of synthetic resin or stent mould or by leaving the occlusal part of the tooth and antagonist standing
G16	Therapeutic position registration	5	Renewed registration of the therapeutic position between the upper and lower jaws by means of a wax impression and renewed plaster casting
G20	Intra oral bite registration	10	Seagull registration
Part C Miscellaneous			
G71	Mandibular Reposition Appliance (MRA)	50	Casts, registration, insertion and instruction; incl. 2 months aftercare. Excl. Technique costs
G72	MRA check-up consultation	5	Incl. necessary corrections. Not to be charged within two months after MRA insertion
G73	MRA repairs, with cast	8	Excl. Technique costs
H	X. Surgical Procedures (including anaesthetic)		
Part A			
H10	Extraction	4	Including basic wound dressing
H15	Next extraction in the same session and the same quadrant	3	
H20	Suturing, per alveolus	1.5	
H21	Cost of suturing material		To be charged extra in combination with H codes, but not with codes H10, H15, H25 and H90. Per H code once only. Not in combination with codes from other chapters.

Code	Description	Points	Explanation
H25	Extensive wound dressing	1	Intended is wound dressing after extractions, such as wound edge correction, alveolar corrections, excochleation
H26	Suturing soft tissues	11	E.g. lip suturing, incl. wound dressing
H30	Complicated extraction without mucoperiosteal lift	10	Incl. suturing and wound dressing
	Repositioning/replantation excluding pulpal treatment		Including temporary fixation, irrespective of the method used: incl. suturing and wound dressing
H50	First tooth	10	
H55	Adjacent tooth	3	
Part B			
H90	Preparation of the dental surgery prior to performing surgical procedures such as defined in part B	10	Making the "operating theatre" within the practice ready for use in accordance with sterile environment requirements. This code is only chargeable if specific measures are taken that are comparable with an equipped operating theatre
H35	Complicated extraction with mucoperiosteal lift	12	Including suturing and wound dressing
H40	Alveolectomy, per jaw	9	As an individual procedure, including suturing and wound dressing
H41	Frenectomy	6	Including suturing and wound dressing
	Apicectomy per root:		This involves performing an apicectomy after endodontic treatment; fee payable only for 2 apices per tooth max.; incl. suturing and wound dressing
H42	1. Without root filling	12	
H43	2. With reserve or retrograde root Filling	16	
H44	Primary antrum closure	11	Suturing in such a way that the mucosal edges will close free from tension: including suturing and wound dressing
H59	Treatment of an alveolar process fracture, per jaw	14	As an individual procedure: incl. suturing and wound dressing
	Cyst operation:		Incl. suturing and wound dressing
H60	1. Marsupialization	14	

Code	Description	Points	Explanation
H65	2. Primary closure	27	
	Correction of those parts of the jaw that support the prosthesis, including the soft tissues involved: hyperplastic fibroma. Schlotterkamm, tubercle correction, and suchlike		Incl. suturing and wound dressing
H70	1. One-sided per jaw	14	
H75	2. Double-sided per jaw	27	
	Torus alveolotomy, comparable Preprosthetic bone corrections		
H80	1. One-sided per jaw	19	
H85	2. Double-sided per jaw	32	
P	XI. Removable prosthetics		
P60	Extensive examination as to the functioning of an existing denture	6	E.g. checking the vertical bite, occlusion/articulation examination. For minor complaints: see C13
P65	Methodical filing of an existing denture	5	
P06	Tissue conditioning complete denture	7	Resurfacing an existing denture with non-hardening soft lining materials
P17	Extra for bite registration with specific equipment	10	E.g. Seagull registration
	Partial acrylic denture From the first consultation up to and including insertion, aftercare for two months after insertion, also including relationregistration and curved anchors, if any		
P10	1-4 teeth	15	
P15	5-13 teeth	30	
P16	Extra for individual cast with occlusal rim	11	
P18	Extra for cast anchor	3	Including filing for clasp
	Frame denture From the first consultation up to and including insertion, aftercare for two month after insertion, also including design, clasps, filing, individual cast and relation registration		
P34	1-4 teeth	41	
P35	5-13 teeth	56	
	Precision anchorage		In frame or overdentures
P31	Root cap with post	25	E.g. Richmond cap

Code	Description	Points	Explanation
P32	Extra per precision anchor slot i.e. per bar attachment	15	One fee both matrix and patrix
P33	Extra for telescope crown	10	Extra in addition to crown fee
Immediate denture			
P40	Denture fee, increased by the number of removed teeth that are immediately replaced	2.5	Excluding extraction and rebasing, incl. aftercare during two months after insertion Maximum charge 8 teeth per jaw
Temporary denture			
P45	Temporary denture 6 to 8 teeth	20	Upper or lower denture for the (edentulous) patient, with synthetic rims, if any Only for temporary use.
Complete denture			
From the first consultation up to and including insertion, incl. bite registration without specific equipment and aftercare during two months after insertion			
P21	Upper denture	30	
P25	lower denture	40	
P30	Complete denture	65	
Extra fees payable			
P36	Individual cast without occlusal rim	5	Per jaw
P14	Individual cast with occlusal rim	11	Per jaw
P37	Mounting front teeth in a separate session	6	The individual mounting of front teeth as an extra procedure, prior to complete mounting and trial in wax
P27	Occlusal balancing	10	Filing the compressed denture in an articulator, before insertion
P28	Re-registration and remounting	10	Replacing the denture in the articulator after insertion and after re-registration with specific equipment (for filing after remounting see P65)
Specific methods			
P38	Extra for vertical bite registration with the aid of specific equipment	11	E.g. by means of Timmers's hinge articulator
P39	Extra for neutral zone registration	15	E.g. according to the Berensin & Schiesser method
P41	Extra for relining of alginate impression	5	

Code	Description	Points	Explanation
P42	Extra for specific A-zone registration	5	A-zone registration and grooving of plaster cast, followed by adjustment of individual tray by means of a shellac rim
P43	Extra for extra bite registration with wax rims	6	Including insertion of lip filler
Overdenture			
P29	Extra for each capped tooth	8	Including shaping and preparation of the root face, filing and polishing
Rebasing/relining complete denture			
P01	Indirect without occlusal rim	7	
P02	Indirect with occlusal rim	15	
P03	Direct without occlusal rim	10	Relining with cold polymer synthetic resin
P04	Direct with occlusal rim	15	Relining with cold polymer synthetic resin
P70	Rebasing overdentures on natural pontics, without bar detachment	28	Only when the pontics are interconnected by means of a bar, irrespective of the number of pontics
Complete denture repairs			
P07	Denture repair without cast	3	
P08	Denture repair with cast	8	
Partial denture, frame denture			
P56	Tissue conditioning	7	Resurfacing an existing denture with nonhardening soft lining materials
P51	Indirect without occlusal rim	7	
P52	Indirect with occlusal rim	15	
P53	Direct without occlusal rim	10	Relining with cold polymer synthetic resin
P54	Direct with occlusal rim	15	Relining with cold polymer synthetic resin
Partial denture/frame denture repairs			
P57	Denture repair without cast	3	
P58	Denture repair with cast	8	
Extending dentures			
P78	Extending partial with tooth/teeth to complete denture, incl. cast	8	

Code	Description	Points	Explanation
P79	Extending partial denture with a tooth or anchor clasp, incl. cast	8	

T XII. Periodontics

The procedures and fees in chapter XII are exclusive of:

- X-ray procedures (chapter II)
- the cost price of material used in the application of regeneration techniques
- the cost price of specific laboratory testing such as bacteriological test and including oral hygiene instruction

Part A in this chapter includes the procedures and fees payable for examination diagnostics, treatment and aftercare of patients with periodontal disease (registered DPSI-score 3 or score 4) in accordance with existing protocols.

Part B includes the procedures and fees payable for specific periodontal treatment, irrespective of the DPSI-score measured.

Part A

Codes from part A may not be used in combination with codes C11, C12, C13, C22, C28, M10, M20 and M21. Also codes M50, M55 and M59 cannot be used in combination with the procedures mentioned in paragraphes II, IV and VI from part A.

I. Examination diagnostics and treatment planning

T 11	Periodontal examination with pocket status	26.5	Applicable to patients with DPSI-score 3 negative. Irrespective of the number of session
T 12	Periodontal examination with periodontium status	29	Applicable to patients with DPSI-score 3 positive or score 4. Irrespective of the number of sessions

II. Initial periodontal treatment

T21	Initial periodontal treatment by a dentist, per tooth	5,4	Fee payable only if preceded by codes T11 or T12. Applicable for treatment of teeth with a registered pocket depth of 4 mm or more
T22	Initial periodontal treatment by an oral hygienist, per tooth	4	Fee payable only if preceded by codes T11 or T12. Applicable for treatment of teeth with a registered pocket depth of 4 mm or more.

III. Re-assessment after initial treatment

T31	Re-assessment with pocket status	15.5	Applicable after initial treatment of patients with DPSI-score 3 negative. Irrespective of the number of sessions.
T32	Re-assessment with periodontium status	18	Applicable after initial treatment of patients with DPSI-score 3 positive or score 4. Irrespective of the number of sessions.

Code	Description	Points	Explanation
T33	Extensive consultation about follow-up treatment	8	Only in combination with T31 and T32
IV. Periodontal aftercare			
Only applicable after initial treatment and re-assessment. Also applicable after evaluation of performed periodontal surgery.			
T51	Brief consultation with a dentist about periodontal aftercare	14	
T52	Brief consultation with an oral hygienist about periodontal aftercare	10,5	
T 53	Standard consultation with a dentist about periodontal aftercare	20,2	
T54	Standard consultation with an oral hygienist about periodontal aftercare	15,2	
T55	Extensive consultation with a dentist about periodontal aftercare	26,9	
T56	Extensive consultation with an oral hygienist about periodontal aftercare	20,2	
T 57	Local anaesthetic	15	Once per session, irrespective of the number of teeth. Including materials.
V. Evaluation examination			
T60	Evaluation examination with pocket status	26.5	Applicable after performed periodontal treatment and aftercare to patients with DPSI-score 3 negative, including follow-up treatment discussion
T61	Evaluation examination with periodontium status	29	Applicable after performed periodontal treatment and aftercare to patients with DPSI-score 3 positive or score 4, including follow-up treatment discussion
VI. Periodontal surgery			
(including preparation treatment room, anaesthetic and oral hygiene instruction/information)			
T70	Flap operation in one interdental space	32.5	
T71	Flap operation per sextant	50	
T72	Extensive flap operation per sextant	60	Including vestibuloplasty, if any, if performed simultaneously. In the case of infected pockets that are deeper than 6 mm after initial periodontal treatment, in combination with one or more of the following complicating factors:

Code	Description	Points	Explanation
			-loss of attachment of more than 4 mm -furcation disorders -bone crest irregularities (angular defects) -unusual anatomical gingiva structure -irregular tooth position
T73	Direct post operative care, brief	10	Intended for the first check-up session, approx. one week after the operation
T74	Direct post operative care, extensive	26.9	Per session
T75	Post operative evaluation examination with periodontium status	26	Including discussion follow-up treatment (for successive periodontal aftercare see T51 up to and including T56)
T76	Tubercle or retromolar plastic	12.5	In combination with T72 in the same sextant
Part B			
1 Periodontal surgery, not included in Part A			
	(including preparation treatment room, anaesthetic and oral hygiene instruction/information)		
T80	Gingiva transplant	21.5	Palato-gingiva tissue transplant
T81	Tubercle or retromolar plastic	17.5	As an individual procedure, not in combination with flap operation
T82	Gingivectomy per tooth	9.5	
T83	Gingivectomy per sextant	25	
Regeneration techniques			
Excluding the cost of materials inserted			
T84	Insertion of regeneration materials as an individual procedure, per sextant	60	Irrespective of the number of teeth per sextant. Also applicable in a coronary or lateral repositioning of a muco-gingival patch
T85	Insertion of regeneration material as a non-individual procedure, simultaneously with flap operation in the same sextant, per tooth	20	Payable in addition to the fee of a flap operation
T86	Surgical removal of regeneration material	32.5	
Periodontal crown lengthening procedure			
Flap operation including cervical bone level correction as pre-treatment for future restorations			
T87	Crown lengthening per tooth	32.5	
T88	Crown lengthening per sextant	60	

Code	Description	Points	Explanation
Direct post-operative care			
Checking the wound healing process, removal of sutures and wound dressing, if any, including instruction on oral hygiene and oral hygiene replacement measures, removal of plaque and staining and, if necessary, local disinfecting			
T89	Direct post-operative care, minor	10	
T90	Direct post-operative care, extensive	26.9	Per session
II Miscellaneous			
T91 and T92 are specifically intended for periodontal surgery not included in Part A and bacteriological testing			
T91	Pocket registration	6	Exploratory probing of pocket depth around all teeth present and registration of all pockets deeper than 4 mm
T92	Periodontium registration	12	Pocket registration (see T91) and also: -measuring of probe depth and/or attachment loss incl. data registration -registration of sulcus bleeding after probing -tooth mobility registration -registration of furcation data -consultation with the patient
T93	Bacteriological periodontal testing	7	Carrying out a localised paro status and taking at least three plaque samples including discussing the bacteriological data with the patient. Excl. laboratory cost. This fee not in combination with M322 on the same data
T94	Periodontal abscess treatment	13.5	Examination, anaesthetic and root planning, incl. instruction oral hygiene replacement measures
T95			

D XIII Orthodontics

For treatment within the framework of orthodontics only codes from chapter XIII may be charged. Codes from other chapters are never applicable.

Unless stated otherwise these fees are inclusive of technique costs and are irrespective of the number of consultations per treatment month.

Code A	Description Consultation	Points
D61	First consultation	3.8
D62	Follow-up consultation	3.8

Code	Description	Points	Explanation
D54	Check-up consultation	3	
D63	Second opinion	18	
D64	Missed appointment		If the appointment has not been cancelled in time (24 hours in advance at the latest) the time reserved may be charged for in all fairness from 0-100% of the number of points of the treatment planned. This under the assumption that in the time reserved no other patients could be treated or other work could be done. Patients have to be informed about this rule.

Orthodontic casts and X-ray diagnostics

D02	Orthodontic casts	6.1	
D03	Producing a panoramic radiograph	8.5	
D04	Producing a lateral cranial radiograph	5.3	
D05	Producing a front and rear cranial radiograph	5.3	
D06	Intra oral X-ray (3 x 4 cm)	2.8	
D07	Occlusal bitewing X-ray	2.8	
D08	Extra oral X-ray (13 x 18 cm)	3.7	
D09	X-ray diagnostics by means of hand/wrist radiographs	4.5	
D11	Assessment orthodontic casts	12.5	
D13	Assessment panoramic radiograph	5	
D14	Assessment lateral cranial radiograph	14.8	
D15	Assessment front and rear cranial radiograph	14.8	

Treatment with vacuum moulded appliances, such as Invisalign

D18	Initial fee vacuum moulded appliances		
D19	Treatment fee per month, up to and incl. month 24		
D20	Treatment fee per month, month 25 and following months		

Treatment with exclusively or mainly removable appliances

D21	Initial fee removable appliances	28.1	
-----	----------------------------------	------	--

Code	Description	Points	Explanation
D22	Transition fee from removable to partially fixed appliances	111.6	
D23	Transition fee from removable to fully fixed appliances	171	
D24	Treatment fee per month up to and incl. month 24	9	
D25	Treatment fee per month month 25 and onwards	9	
Treatment with partially fixed appliances			
D31	Initial fee partially fixed appliances	111.6	
D32	Transition fee from partially fixed to fully fixed appliances	85.7	
D33	Treatment fee per month up to and incl. month 24	10.8	
D34	Treatment fee per month month 25 an onwards	9.0	
Treatment with fully fixed appliances in upper and lower jaws			
D41	Initial fee fully fixed appliances	171	
D42	Treatment fee per month up to and incl. month 24	13.2	
D43	Treatment fee per month month 25 and onwards	9	
Treatment with fixed lingual appliances			
D 44	Initial fee partially fixed lingual appliances		
D 45	Treatment fee partially fixed lingual appliances up to and incl. month 24		
D 46	Transition fee from partially fixed lingual appliances to fully fixed lingual appliances		
D 47	Initial fee fully fixed lingual appliances		
D 48	Treatment fee per month fully fixed lingual appliances up to and incl. month 24		
D 49	Treatment fee per month partially fixed and fully fixed lingual appliances, month 25 and following months		

Code	Description	Points	Explanation
Miscellaneous treatment			
D51	Replacement appliances after negligent use (excl. technique cost)	10.8	
D52	Repairs after negligent use (excl. technique cost)	7.8	
D53	Treatment with basic orthodontic appliances (excl. technique cost)	10.8	
D54	Check-up consultation	3	
D 55	Surcharge for ceramic, or metal self-ligating brackets, per bracket		
D 59	Surcharge for self-ligating ceramic brackets, per bracket		
D56	Gum shield for protection during orthodontic treatment (excl technique costs)		
D 16	Surcharge for the use of intermaxillary corrective appliances (such as JasperJumper, Forsus spring)		At costprice
D 17	Surcharge for the use of jaw corrective appliances with fixed bands (such as MARA, Herbst)		At costprice
D57	Extraction, per tooth		
D58	Fibrectomy, per tooth		

J XIV. Oral Implantology

The treatment and maximum fees of Chapter XIV for Oral Implantology are:

- Exclusive of X-rays;
- Exclusive of the cost price of the implant itself and all other materials inserted into the mouth to benefit the implantation, be it either temporarily or permanently;
- Exclusive of the surgical operation to raise donor tissue, in case autogenous bone material is used;
- Exclusive of the cost price of dental technique
- Inclusive of the cost price of all consumables and instrumentation that goes with the implant system, inserted into the mouth not temporarily or permanently;
- Inclusive of anesthetics.

J97	Overhead costs implants		Once only per total implant treatment in addition to codes J20 and J27 per jaw.
J98	Overhead costs pre-implant surgery		Once only per total implant treatment in addition to codes J09 and J12 per jaw.

Code	Description	Points	Explanation
I. Examination, diagnostics and treatment planning			
J01	Initial examination implantology	13	General examination, information and global assessment of whether or not dental implants are indicated.
J02	Extended examination Implantology	20	Specific follow-up examination, including drawing up and discussing a treatment plan; including endorsement application and consultation with/reporting to the referring dentist. May be charged for once only.
J03	Trial mounting	27	For the benefit of implant placement.
J04	Interpretation CT scan.	10	This includes: - Assessment of CT scan made elsewhere- Discussion with the patient.
J05	Implant positioning based on CT scan	9	Per implant treatment. Can be combined with code J03.
II. Pre-implant surgery			
The maximum fees for pre-implant surgery are the fees for the implantation planning, the preparation of the treatment room prior to surgery and the surgical insertion of autogenous bone and/or bone replacement material and membrane, if any. The fees are inclusive of direct post-operative care, the possible adjustment of existing dentures, but exclusive of the surgical procedure to raise donor tissue and/or the cost of non-autogenous material for the augmentation.			
J08	Granulate, in extraction alveolus	4	Granulate or other allogeous material, to be inserted into the extraction alveolus to prevent resorption.
J09	Sinus floor elevation first jaw half	48	Insertion of autogenous bone and/or bone replacement material, incl. membrane placement. This is an individual procedure performed in a separate session, not to be combined with J20.
J10	Sinus floor elevation second jaw half in the same session	30	Only in combination with J09 when performed in the same session.
J11	Preparation donor place	27	Exposing bone tissue for obtaining autogenous bone transplant material.
J12	Broadening and/or heightening of the jaw in the front region of the first jaw half	29	Insertion of autogenous bone and/or bone replacement material, incl. membrane placement. This is an individual procedure performed in a separate session, not to be combined with J20. May be combined with J09, J10 and/or J11.
J13	Broadening and/or heightening of the jaw in the second jaw half in the same session	14	Only in combination with J12.
J07	Surcharge for the cost of drills That are used only once.	14	At cost price, stating batch number. Only in combination with codes J11, J20, J27.

Code	Description	Points	Explanation
II. -A Pre and peri implant surgery: miscellaneous			
J06	Exposing the foramen mentalis	6	Only for the purpose of the surgical correction of the nerve mentalis exit, per jaw half. Only in combination with code J20.
J15	Broadening and/or heightening of the jaw in the front region of the first jaw half	17	Only in combination with J20. Not in combination with J12 or J13 in the same implant treatment.
J16	Broadening and/or heightening of the jaw in the second jaw half	17	Only in combination with J22. Not in combination with J12 or J13.
J17	Additional sinus floor elevation	26	Per jaw half. Only in combination with J20, J21 and/or J22. Not in combination with J09 and J10 in the same implant treatment.
J18	Orthograde sinus floor elevation	12	Insertion of autogenous bone and/or bone replacing material into the drilled implant hole. Only in combination with J20, J21 and/or J22. Not in combination with J09 and J10 in the same implant treatment.
J19	Surcharge esthetic zone	13	Only to achieve optimal esthetics in crown and/or bridgework on dental implants in the upper front region. May be charged for per implant.
III. Implant surgery			
The maximum fees for dental implant surgery are the fees for the implantation planning, preparing the practice operating theatre for surgery with a view to hygiene and sterility and the surgical placement of the dental implant(s) and also placement of a/the healing abutment(s).			
The fees include post-operative care and, if necessary, the adjustment of existing dentures during two months after placement. The fees are exclusive of the cost price of the implant and the abutment, the operation to harvest donor bone tissue, and/or material costs for a simultaneous augmentation.			
J20	Placement first implant per jaw	39	This includes:- surgical preparation, loosening and lifting of the mucoperiosteum incl. corrections to the alveolar process, if any- preparation of the implant base- placement of the implant- checking the primary stability - placement (healing)abutment- putting back and adjusting the mucoperiosteum, incl. suturing.
J21	Placement of each following implant in the same jaw	14	In the same wound. Only in combination with J20.
J22	Placement of each following implant in the same jaw	23	Not in the same wound. Only in combination with J20.
J23	Placement first (healing) abutment	15	Only applicable when two-phase technique is used.
J24	Placement following (healing) abutment	5	In the same wound. Only applicable when two-phase technique is used.
J25	Placement following (healing) abutment	9	Not in the same wound. Only applicable when two-phase technique is used.

Code	Description	Points	Explanation
J26	Difficult removal of dental implant	33	As an independent procedure. Not to be charged for within two months after implant placement in the same location. Incl. suturing and wound dressing
J27	Replacing a dental implant	39	Incl. examination, planning, operation and aftercare. Not to be charged for within two months after implant placement in the same location. Difficult removal of previous implant not included.
IV. Miscellaneous			
J30	Binding tissue transplant	21	Binding tissue transplant from the palate.
J31	Following binding tissue transplant	10	Binding tissue transplant from the palate, simultaneous with implant placement or during the second phase, per implant.
J32	Removal of fractured abutment/occlusal screw	23	Incl. replacement and re-insertion and, if necessary, tapping of a screw thread. Not to be charged for within two months after placement.
V. Meso-structures			
Making a retention structure on dental implants for prosthetic follow-up treatment.			
J40	Two magnets/press-stud attachments	31	Including fitting the abutments.
J41	Each following magnet/press-stud attachment	7	Within the same construction.
J42	Bar between two implants	41	Fee for the entire construction, incl. fitting the abutments.
J43	Each following bar between implants in the same jaw	13	Within the same construction.
J44	Replacing an abutment	5	To be used as a core in crown and bridgework.
VI. Prosthetic treatment after implant placement in the edentulous jaw			
J50	Upper and lower dentures	103	Making a set of dentures on a meso-structure and simultaneously a set of non-implant retained dentures for the other jaw. This fee may also be charged in case of replacement dentures.
J51	Lower dentures	67	Making a single set of lower dentures on a meso-structure.
J52	Upper dentures	67	Making a single set of upper dentures on a meso-structure.
J53	Converting dentures	20	Converting existing dentures to fit press studs/magnets. Meant for permanent use. Exclusive of meso-structure.

Code	Description	Points	Explanation
J54	Converting dentures to fit bars between two implants	26	Converting existing dentures to fit a bar construction. Meant for permanent use. Exclusive of mesostructure.
J55	Converting dentures to fit bars between three or four implants	30	Converting existing dentures to fit a bar construction. Meant for permanent use. Exclusive of mesostructure.
J56	Converting dentures to fit bars between more than four implants	35	Converting existing dentures to fit a bar construction. Meant for permanent use. Exclusive of mesostructure.
J57	Surcharge replacement dentures On an existing bar construction	17	Making dentures to fit an existing bar construction. Only in combination with J50, J51 or J52.
J58	Surcharge replacement dentures On an existing bar construction Between three or four implants	22	Making dentures to fit an existing bar construction. Only in combination with J50, J51 or J52.
J59	Surcharge replacement dentures On an existing bar construction Between more than four implants	27	Making dentures to fit an existing bar construction. Only in combination with J50, J51 or J52.

VII. Aftercare implantology

Standard aftercare consultations will be charged under codes C11 and C12 respectively, for incidental consultations code C13 is applicable. This does not apply within two months after placement of the mesostructure.

J60	Specific aftercare consultation	11	Regular check-up with specific implant-related procedures.
J61	Extensive aftercare consultation	18	Regular check-up including detachment of the mesostructure.

VIII. Prosthetic aftercare

Standard aftercare consultations will be charged under codes C11 and C12 respectively, for incidental consultations code C13 is applicable. This does not apply within two months after placement of the prosthetics.

J70	Rebasing without bar detachment	28	Irrespective of the number of implants per jaw.
J71	Rebasing with bar detachment on two implants	35	
J72	Rebasing with bar detachment on three or four implants	40	
J73	Rebasing with bar detachment on more than four implants	45	
J74	Repair without bar detachment	11	Repair or replacement of clips, magnets or press-studs, irrespective of the number of implants. Incl. aftercare and adjustment of the existing dentures.

Code	Description	Points	Explanation
J75	Repair with bar detachment on two implants	21	Including aftercare and adjustment of the existing dentures.
J76	Repair with bar detachment on three or four implants	26	Including aftercare and adjustment of the existing dentures.
J77	Repair with bar detachment on more than four implants	31	Including aftercare and adjustment of the existing dentures.

U XV. Dental treatment for the mentally and/or physically disabled

U10	Hourly fee for dental treatment to patients who are mentally and/or physically disabled	26,9	General fee This hourly fee concerns treatment of the patient category who, as a result of a their mental and/or physical disability, are more difficult to treat to such an extent that the average treatment time is longer than is usually the case.
U05	Hourly fee in units of five minutes		U05 is intended for treatment which takes up less than a full hour

Z XVI. Subscription fees

General

Subscription fees are possible, if the dentist and the patient into an agreement based on the subscription fee system instead of the treatment bases system

Z10	Subscription category	A	1.3	€ 5.80	per month
Z20	Subscription category	B	2	€ 8.90	per month
Z30	Subscription category	C	2.7	€ 12.00	per month
Z40	Subscription category	D	3.3	€ 14.70	per month
Z50	Subscription category	E	4	€ 17.80	per month
Z60	Subscription category	F	1.1	€ 4.90	per month

Definitions of subscription categories A up to and incl. F

The subscription comprises the following dental treatment during a certain period of time in order to maintain a situation of stable oral health in a patient, with the exception of orthodontics (D), evening, night and week-end surcharges and a surcharge for house calls (C80 and C85/C87).

In addition the subscription is exclusive of:

Code	Description	Points	Explanation
------	-------------	--------	-------------

-technique costs;

-dental treatment rendered by another dentist e.g. after referral or in emergencies;

-dental procedures necessary to secure a situation of stable oral health in a patient that may not have been carried out after consultation.

Categorization of a patient in categories A up and incl. E depends on the total number of subscription points that are applicable to this patient.

Schedule:

Total number of subscription points	Category
- 10	A
11-50	B
51-90	C
91-140	D
≥ 141	E

Category F stands for edentulous patients

The number of subscription points is derived as follows:

	Criterion	Subscription points
Restoration	plastic	-amalgam, per surface 1
		-composite, per surface 2
	non-plastic	(all restorations) 6
	core	4
Root canal treatment	upper incisors	4
	lower incisors	8
	canines	8
	premolars	8
	molars	12
Fixed replacement	per dummy	6
Removable replacement	0-5 teeth	10
	6-10 teeth	16
	11+ teeth	24
Oral hygiene	excellent	0
	good	2
	average	6
	bad	12
Condition of the gums	perfect	0
	slight inflammation of the gums	2
	average inflammation of the gums	4
	serious inflammation of the gums	6
Supporting tissue	no or hardly any bone loss	0
	some bone loss	6
	average/serious bone loss	18
